

### GRAPHICS AND IMAGING

**SmartAsset's** Graphics Generator provides system users with instant pictorial representations of all asset information from equipment performance graphs, to pie, line and area charts, etc. Graphics can be used to display photo images for referencing and insurance purposes of asset types, buildings, floor plans or even personnel.

### BUSINESS AND TECHNOLOGY BENEFITS

- Simplifies and streamlines Asset Management.
- Asset value at your fingertips.
- Depreciation as per department, location, division, branch etc.
- Allocation and reallocation of assets.
- Tracking of the movement of fixed assets.
- Insurance Tagging to assets.
- Ensures complete visibility of assets across your enterprise.
- Provides greater controls and better financial discipline.
- Enhances decision making capabilities.
- Helps in forecasting and improves planning.
- Helps to reduce cost and increase profitability.
- Boosts business productivity.
- Keeps pace with the growing business needs.

### REPORTS

**SmartAsset** comes with its own Report Generator utility.

Standard features include:

- Pre-formatted standard reports.
- Custom report writer tool.
- Multiple selection & report sorting.
- Data capture report (showing full details of asset allocation) for new asset items captured with the barcode reader
- Asset audit report, comparing asset details on the **Smart Asset** database to the results of the barcode audit and highlighting exceptions such as moved or missing items.
- Last audit date report, listing all assets in terms of when they were last audited and last known location.
- Barcode printing facility (used to automate data capture process).
- Multi output feature for reports generated such as printer, screen, file, and email.
- Multi functional reporting to include any field from any module in the system, e.g. Assets, Suppliers, Locations, Personnel, Cost Centres, Purchasing and Depreciation.

A comprehensive query facility is also provided to allow the user to target a particular group of assets for reporting purposes.

**SmartAsset** provides finance professionals and management decision-makers with the facility to record both fixed and portable items, allowing detailed information to be stored against each asset. Portable assets can be recorded using the latest Pocket PC technology enabling new, transferred and disposed assets to be updated in the system.

**SmartAsset** provides a "cradle to grave" fixed asset management solution with the ability to track every aspect of the asset's life from initial budget proposal through to final disposal. This solution consists of a core asset management module and other elective modules catering for purchasing, tagging and depreciation computations.

**SmartAsset** is flexible enough to be customized to suit your organization's requirement while at the same time robust enough to ensure stability with its consistency and in-built controls.

**SmartAsset** is a complete asset management solution that simplifies the task of managing and accounting for your organization's assets. **SmartAsset** can be deployed and used efficiently across diverse types and sizes of organizations. Recording of data, movement of assets, calculation of depreciation, creation of user defined asset properties (for uniquely defined assets), and setting up customized and user specific reports can all be done with minimal efforts.

### POWERFUL AND EASY TO USE!

In spite of its comprehensive features, **SmartAsset** is easy to use and has a modest learning curve due to the intuitive layout of the software.

### SAVES YOUR TIME!

**SmartAsset** not only streamlines your fixed asset management tasks, but also enables you to exercise effective control with efficient and effortless reporting on summarized and detailed movements in fixed assets.

### EASY ASSET SETUP

**SmartAssets** lets you create and manage an unlimited number of assets for multiple companies, with varied rates and basis of charging depreciation.

### INTUITIVE INTERFACE

Easy Access to asset information using an intuitive graphical user interface with one button access to all critical information.

### GIVES YOU CONTROL

**SmartAsset** gives you complete control of your assets with easily accessible information on its initial cost, location, accumulated depreciation, estimated useful life, and insured value.

### ASSET CATEGORIES

**SmartAsset** enables you to set defaults for a group of assets, as well as, define and pre-set characteristics such as depreciation method and rates.

### DEPRECIATION MANAGEMENT

With **SmartAsset** it's possible to use depreciation methods as straight line, or written down value and forecast your depreciation expenses for each asset, category of asset, or group of assets, for budgeting purposes. **SmartAsset** can also provide you with the wear and tear allowance computed based on current tax laws.

### INSURANCE MANAGEMENT

Feature to scan insurance policies and tag to respective asset, or a group of assets, with an option to capture pertinent information, such as, expiry dates and set reminders for expiry dates.

### ASSET REVIEW

Option to view and analyze in-depth information about assets such as purchase details, asset account, maintenance history, details of upgradation, sale, and disposal, including an option to drill down to

the originating transaction.

### ASSET VALUE

**SmartAsset** allows you to manage assets with powerful tools for adding or changing assets such as disposals, transfers, and mass changes to multiple assets.

### ASSET TRACKING

**SmartAsset** has the ability to track each asset with information on details of assets the company owns, who's using them and in what department / location, through a wide range of hand held devices with bar code technology.

### ASSET VERIFICATION REPORTS

Discrepancy reports or missing assets reports can be generated location-wise, user-wise or department-wise.

### BARCODE AND RFID INTEGRATION

Barcode labels and RFID tags can be fixed on any asset and this can be used for asset tracking and asset reconciliation. **SmartAsset** has an option to print the barcode list. This can be tracked by RFID or barcode hand held reader/scanner.
