## Dot Net Core Developer ( 5+ year Experience)

### **Job Profile :**

- Proven experience as a .NET Core Developer or similar role.
- Strong knowledge of C#, .NET Core framework, and object-oriented programming principles.
- Hands-on experience with ASP.NET Core, Web API development, and RESTful services.
- Proficiency in databases such as SQL Server, MySQL, or NoSQL (e.g., MongoDB).
- Familiarity with front-end technologies (HTML, CSS, JavaScript, and frameworks like Angular or React is a plus).
- Experience with version control tools (e.g., Git).
- Knowledge of cloud platforms such as Azure or AWS is desirable.
- Familiarity with containerization technologies (e.g., Docker) is a plus.
- Strong problem-solving skills and attention to detail.
- Ability to work in a collaborative, Agile development environment.
- Excellent communication and interpersonal skills.

### **Skills Required :**

- Design, develop, and maintain scalable web applications using .NET Core, C#, and related technologies.
- Collaborate with cross-functional teams, including front-end developers, product managers, and QA engineers, to deliver high-quality software solutions.
- Write clean, maintainable, and efficient code following best practices.
- Participate in code reviews to ensure the quality of code and technical design.
- Troubleshoot and debug application issues, and implement solutions in a timely manner.
- Optimize applications for maximum performance, scalability, and security.
- Stay up to date with the latest technologies, frameworks, and best practices in software development.
- Work in an Agile environment with iterative sprints and continuous integration.
- Contribute to the improvement of development processes and methodologies
